HEALTHY LIVING IN SAN BERNARDINO COUNTY!

The **Healthy Communities Program** is a countywide, strategic initiative to improve the health and well-being of all county residents by creating healthy environments and promote healthful lifestyle choices. The program focuses on improving access to physical activity, nutritious food and appropriate health care by building partnerships, educating and facilitating, and providing technical assistance. It serves as a central resource for communities' efforts to become **healthy places to live, work, learn, and play.**
